

Software Developer Position

Job Title: Software Developer

Description: The successful applicant will be involved in the development of augmented reality applications on desktop and mobile platforms (i.e. Android and iOS) as well as other mobile applications in a creative, dynamic and innovative environment. We are looking for an energetic, self-motivated person, able to work under tight deadlines.

Key Responsibilities:

- Develop high quality software applications
- Document code
- Implement and maintain applications fixed for customers
- Draft specifications for new applications
- Travel abroad, assist in new project writing, participate in creation of new products development, and assist in sales processes
- Any other duties as may be required from time to time by your managers.

Required Qualifications:

- Degree in Computer Science or relevant
- Excellent programming skills in C/C++
- Excellent programming skills in Java
- Computer graphics experience (e.g. OpenGL, OpenSceneGraph)
- Results oriented and able to work independently
- Able to communicate effectively and work in a team
- Integrity and professionalism
- Ability to organize and manage multiple priorities
- Excellent knowledge of the English language

Desirable Qualifications:

- Master's degree in Graphics or relevant
- Experience working with Android SDK
- Experience working with iOS SDK
- Familiar with Objective-C
- Experience with Open CV will be considered an advantage
- Prior experience will be an advantage

Remuneration

A competitive salary will be offered according to qualifications and experience.

Applicants should submit a CV and cover letter that details their relevant work and experience at info@ames-tech.com quoting the name of the position in the subject line of the email. All applications will be treated in the strictest confidence. **The application deadline is November 20th 2011.**
